

Task 1: Data Quality Assessment

Objective

The objective of this task is to identify data quality issues and prepare the dataset for analysis.

Dataset Information

- Total Records (Before Cleaning): **1000**
- Total Records (After Cleaning): **992**
- Total Columns: **12**

Missing Values

Column	Missing Values
Age	20
City	13
All Other Columns	0

Observation

The dataset contained missing values in the **Age** and **City** columns.

Duplicate Records

- Duplicate Rows: **0**
- Duplicate Order_ID Values: **8**

Observation

Although no duplicate rows were present, eight duplicate Order_ID values were found and removed.

Data Type

Column	Data Type
Order_ID	Object
Order_Date	DateTime
Customer_ID	Object
Customer_Name	Object
Age	Float
Gender	Object
City	Object
Product	Object
Category	Object
Quantity	Integer

Unit_Price Float	Unit_Price Float
Total_Sales Float	Total_Sales Float

Data Cleaning Performed

- Filled missing values in **Age** using the median.
- Filled missing values in **City** using the mode.
- Converted **Order_Date** to DateTime format.
- Removed duplicate **Order_ID** records.
- Verified that no missing values remained.

Final Dataset Summary

Item	Value
Total Records	992
Missing Values	0
Duplicate Order_ID	Removed
Dataset Status	Ready for Analysis
